SPECIMEN COLLECTION

- No patient preparation is required for sample collection.
- Blood collection tubes:
 - For **serum**, use gold-top SST vacutainer tubes
- Draw blood in collection tube(s) enough for a total of 1 to 5 ml serum. Spin collection tubes, pool serum (if necessary), freeze, then batch for shipping on ice packs or dry ice as appropriate for the test(s) requested (see **Test Directory**² below).
- **CSF**: Collect at least 3-5 ml (3-5 cc) CSF into a sterile tube. Deliver as soon as possible on ice packs.
- LABEL ALL SPECIMENS WITH PATIENT'S FULL NAME, DOB, AND SAMPLE COLLECTION DATE

SHIPPING & DELIVERY INSTRUCTIONS

- Packages should include labelled samples and completed and signed requisition forms. Samples should be shipped in accordance to IATA, ICAO, and TDG regulations.
- No weekend and statutory holiday deliveries.
- **Delivery Address:** **BC Neuroimmunology Laboratory Inc.**
406-8188 Manitoba Street,
Vancouver BC V5X 0L5
Telephone: 604-296-9828

¹ PRIVATE PAYMENT

- Tests that are offered on a "private payment" basis can be paid by the requesting laboratory or the patient ("Self-Pay").
- For patients, all requested self-pay tests must be **PRE-PAID**, before samples can be processed by BC Neuroimmunology Laboratory Inc. Tests can be paid for by personal credit card or cheque. Credit card payments for self-pay tests can be submitted through our secure online payment portal <https://bcneuro.ca/payment/>. For any enquiry, please contact us at accounting@bcneuro.ca.
 - For laboratories, please contact us for your payment options of invoices or email accounting@bcneuro.ca for more information.

² TEST DIRECTORY

For test-specific information, such as methodology, sample handling and stability, minimum volume, turnaround time, testing frequency, and terms of coverage under the BC Medical Services Plan, please see our [test directory](https://bcneuro.ca/tests/), which can be found on our website (<https://bcneuro.ca/tests/>).

³ MSP Guidelines for MuSK Ab and VGCC Ab Testing within British Columbia

As per the Medical Services Plan of BC (MSP), for MuSK and VGCC antibody testing to be covered by provincial health services, testing must be requested by a **neurologist** or, for MuSK Ab, an **ophthalmologist** or **neuro-ophthalmologist**. Otherwise, testing can be ordered on a private-pay¹ basis (see *above*).

For MuSK Ab Testing, the patient must have been found AchR Ab negative within the last 18 months with BC Neuroimmunology or with another laboratory, in which case, a copy of the results from the other laboratory must be attached or stated on the requisition by the ordering physician. MuSK Ab testing can be re-ordered for patients whose previous MuSK Ab results in Borderline or Positive, within 3-6 months of the previous test date. MSP does **not** cover repeat testing for patients previously negative for MuSK Ab. However, in the event that a patient's symptoms are significantly progressing, and repeat MuSK Ab testing is needed, please contact the laboratory for arrangements.

For VGCC Ab Testing, MSP does not cover repeat testing under any circumstances, as it is a once-in-a-lifetime test. Any additional testing must be ordered on a private-pay¹ basis.

ACCREDITATIONS

This facility is accredited by the College of American Pathologists (CAP) and certified under CLIA for high-complexity testing. All tests are within the CAP-accredited scope except those marked with a caret (^).

BC Neuroimmunology Labs Inc. is also accredited by the College of Physicians and Surgeons of British Columbia's Diagnostic Accreditation Program (DAP) and holds ISO 15189 accreditation. Tests marked with an asterisk (*) but not a caret (^) are validated laboratory-developed tests performed by BC Neuroimmunology. DAP permits these tests to be performed, but they are not currently included in the DAP-accredited scope.

The personal information collected on this form and any medical data subsequently developed will be used and disclosed only as permitted or required by the *Personal Information Act*. The BC Neuroimmunology Laboratory Inc. privacy statement is available on our website (<http://bcneuro.ca>). Use of this form implies consent for the use of de-identified patient data and specimens for quality assurance purposes.
